PROFESSIONAL SUMMARY

IT Support professional with hands-on experience supporting end users, troubleshooting hardware and software issues, and helping maintain smooth day-to-day IT operations. Internationally educated in Canada and comfortable working with Windows 10/11, Microsoft 365, Active Directory fundamentals, ticketing workflows, printers, peripherals, and basic networking. Known for patient customer service, clear communication, and a strong interest in growing into system administration, Windows Server, cloud productivity, and infrastructure support roles.

PROFESSIONAL EXPERIENCE

IT Support / Technical Support

Jan 2026 - Apr 2026

OverIT, Jalandhar, Punjab

- Supported end users with Windows, Microsoft Office / Microsoft 365, hardware, software, and basic network issues.
- Diagnosed and resolved desktop, laptop, printer, peripheral, and account-access problems while keeping users informed.
- Handled routine user account administration, including password resets and access support.
- Logged, updated, and documented incidents and service requests using ticketing workflows.
- Escalated complex issues to senior technical teams with clear notes and troubleshooting steps.
- Assisted with employee onboarding by preparing workstations, devices, and user profiles.
- Maintained a service-focused approach and supported timely issue resolution for end users.

PROJECTS / HOME LAB

Active Directory Lab

Created and managed users, groups, and organizational units in a virtual lab environment.

Windows Server Lab

Configured basic Windows Server roles and practiced routine administrative tasks.

Microsoft 365 Administration Lab

Practiced user management, licensing, and basic security settings.
